Python (Pandas, Matplotlib) | SQL | Data Analyst | AI Automation | Geology (B.Sc.)

SUMMARY

Data Analyst with a Geology degree from University of Indonesia and exploration experience at Medco E&P Indonesia. Experienced in reporting, dashboards, market research, and regulatory reporting for C-level stakeholders, and in building AI agent automations (Claude, MCP, Python) that turn manual monthly reports into one-command workflows. Eager to apply geoscience knowledge and data skills to energy and mining research, geoscience data, and mine planning.

WORK EXPERIENCE

PT. Indo Koala Remittance (Jack & Transfez) **Jakarta, Indonesia**
Data Analyst *July 2025 – Present*

- Primary data analyst for B2B payments, cross-border remittance, and FX product lines.
- Build and maintain monthly reports and dashboards (GTV, MAU/NPU, FX margin, transaction volume) in Metabase on ClickHouse and Amazon Athena.
- Conduct market research and prepare data-driven presentation decks for leadership and C-level stakeholders.
- Prepare investor reports and monthly regulatory filings for Bank Indonesia with high data accuracy.
- Built AI agent automations (Claude + MCP) that pull data from Metabase/ClickHouse, apply business rules, and generate ready-to-send monthly Excel reports, turning manual multi-source reporting into a one-command process.
- Handle ad-hoc data requests from Finance, Business Development, and Reconciliation teams.

PT. Indo Koala Remittance (Jack & Transfez) **Jakarta, Indonesia**
Intern Data Analyst *February 2025 – June 2025*

- Compiled and analyzed monthly financial reports and processed cross-functional data requests.
- Cleaned data and automated workflows with Python, significantly reducing manual processing time.

PT Medco E&P Indonesia **Jakarta, Indonesia**
Intern Exploration Geologist Certificate Link *April 2023 – September 2023*

- Interpreted seismic data using Petrel to identify hydrocarbon anomalies at various depths (onshore North Sumatra).
- Supported gas reading analysis to pinpoint potential leads and prospects.
- Performed area and volume calculations for regions with hydrocarbon potential.

AI AUTOMATION PROJECTS (WORK)

- **Agentic B2B Active & New Partner Report (MAU/NPU)**: AI agent queries 4 reporting sources plus the data warehouse, applies business rules (status filters, case-insensitive dedup, first-ever-transaction logic for new partners), and builds a two-sheet formatted Excel report automatically.
- **Agentic Monthly Remittance KPI Report**: Agent pulls 8 monthly KPIs (GTV, transactions, fees, FX margin revenue/cost, promo cost, MAU, NPU) in one aggregated SQL query and exports a formatted Excel summary for management.
- **AI-Assisted Data Documentation**: Agent extracts table schemas from Metabase and guides analysts through column definitions to produce a standardized data dictionary (data types, definitions, JOIN relationships, filter logic).
- **Reusable Python Automation Framework**: Designed a reusable AI skill that builds end-to-end Python automations: MCP client with auth and retry, pandas transforms, auto-generated narrative insights, Excel export, and scheduled runs.

EDUCATION

University of Indonesia **Depok, Indonesia**
Bachelor of Science, Major of Geology (GPA 3.48/4.00) Certificate Link *August 2018 – January 2023*

Hacktiv8 Bootcamp **Jakarta, Indonesia**
Full Time Data Science Program (Score 95.37%) Transcript & Certificate *September 2024 – December 2024*

PERSONAL PROJECTS

Sales Performance Analysis & Consumer Behavior Insights | *Github Link* *December 2024*

- Built an automated data pipeline (Airflow, Great Expectations, Elasticsearch) and analyzed sales data to identify top products, payment trends, and customer segments. *(Python, Pandas, Apache Airflow, Great Expectations, Kibana, Tableau)*

Data Analysis of Urban Area in Country X Using Amazon Dataset | *Github Link* | *Dashboard* *October 2024*

- Analyzed shipment data to identify delivery trends, peak times, and agent performance; delivered recommendations via a Tableau dashboard. *(Python, Pandas, Seaborn, Matplotlib, Tableau)*

Customer Churn Prediction Using Decision Tree Algorithm | *Deploy Link* *November 2024*

- Developed and deployed a churn prediction model optimized to reduce false negatives and support retention strategy. *(Python, Pandas, Scikit-learn, Feature-engine, Streamlit)*

ShoeVibes Application | *Deploy Link* *December 2024*

- Built an NLP app that extracts key terms from Tokopedia reviews to reveal product strengths and weaknesses. *(Python, Selenium, bs4, Scikit-learn, Hugging Face, Streamlit)*

SKILLS

- **Data & Research**: Market Research, Trend & Time Series Analysis, KPI and Plan-vs-Actual Reporting, EDA, Statistical Analysis, Data Storytelling, Executive Presentations
- **Geoscience**: Exploration Geology, Seismic Interpretation (internship), Gas Reading Analysis, Area and Volume Calculation
- **AI & Automation**: Claude (Agent Skills, MCP), Agentic Workflows, Prompt Engineering, LLM-assisted SQL & Analysis, Python Automation (Pandas, openpyxl)
- **Programming**: Python (Pandas, NumPy, Matplotlib, Seaborn, Plotly, Scikit-learn), SQL
- **Data & BI Tools**: Metabase, Tableau, Power BI, ClickHouse, Amazon Athena, PostgreSQL, Google BigQuery, Apache Airflow, Git/GitHub
- **Others**: Microsoft Excel, Word, PowerPoint, Google Sheets, ChatGPT

CERTIFICATIONS & LANGUAGES

- **BCG** – Data Science Job Simulation (Forage) | *Certificate Link* *November 2024*
- **HackerRank** – SQL (Intermediate) | *Certificate Link* & Python (Basic) | *Certificate Link* *November 2024*
- **IELTS** – Band 7 (Overall) | *Certificate Link* *January 2024*
